

Leaf area plasticity index = leaf area potential (drought) - leaf area potential (well-watered)

Group I Plasticity index (IP-Moa-0) = 0.452

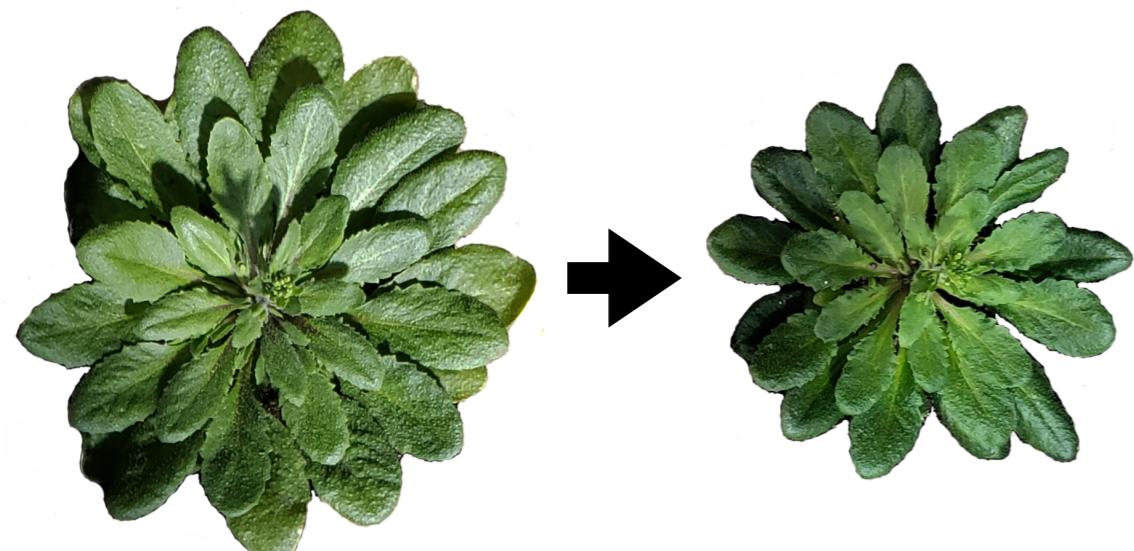

IP-Moa-0 (well-watered) IP-Moa-0 (drought)

Group II Plasticity index (IP-Stop-0) = 0.155

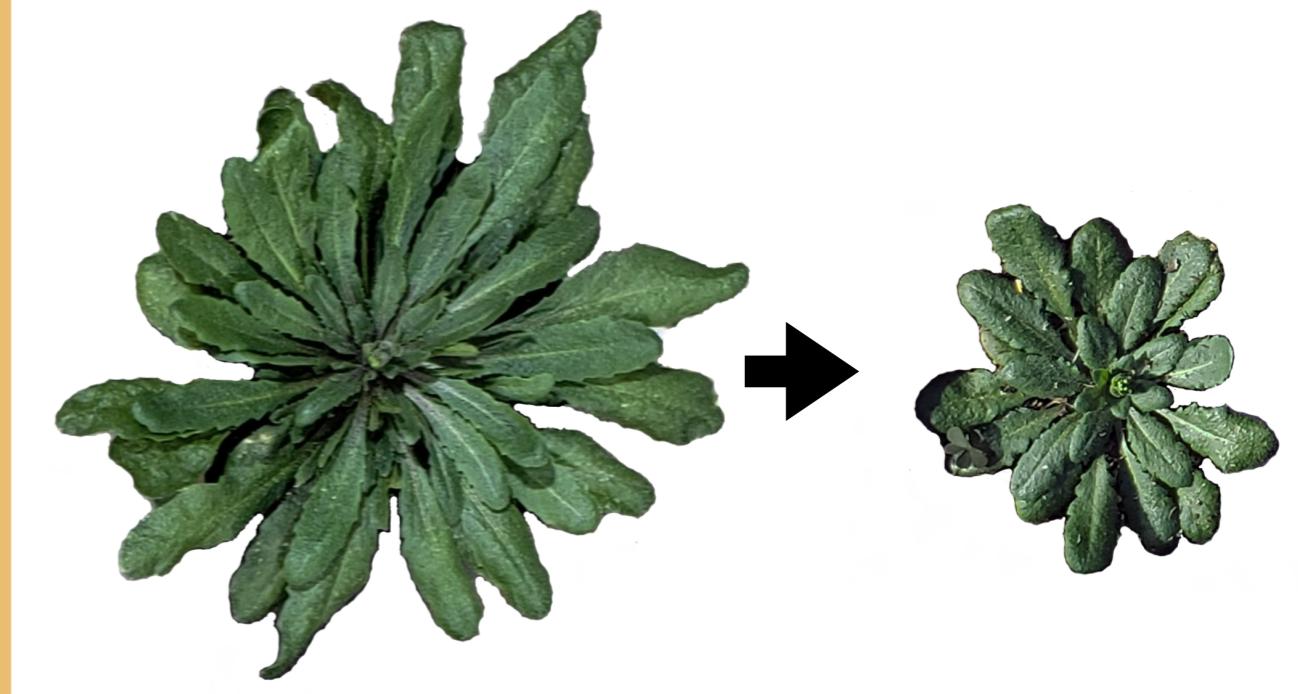

IP-Stop-0 (well-watered) IP-Stop-0 (drought)

Group III Plasticity index (Co) = -0.192

Co (well-watered) Co (drought)

Group IV Plasticity index (Pla) = -0.624

Pla-0 (well-watered) Pla-0 (drought)
